

RE: ART WORK

BELLEVUE HOSPITAL

HO-145/MH-1

TITLE: ENERGY

The sculpture ENERGY is the artists conception of Mitochondria, the process by which the chemical energy of foods is transformed into the kind of energy that is used in the cell.

DESCRIPTION
ANALYSIS:

The sculpture is made up of ~~three different~~ ^{Bronze + Copper} ~~kinds of bronze~~, fused to produce tonality that emulates the elements of the blood, LIFE and the cells peculiar to the energizing forces of life. The power plant of the cell. The ^{of} ~~metamorphosis~~ energy is indicated by the ~~active~~ active negative forms produced by the encirclement of the life giving fluids which in ~~turn~~ turn produce the expendable energy to power other activities of the cell.

The sculpture embodies the thrusting and pulsing movement of ~~the~~ life functioning cellular ~~composition of which are~~ protoplasmic material
