

WILLIAM E. ROSE

LANDSCAPE ARCHITECT & ENGINEER

■ 10 West Waukegan Avenue
Waukegan, Illinois
May 29, 1955

Dear John,

Thanks for your grand and immediate response to my letter. It was wonderful to receive such a fine selection of your work. The hospital board plans to meet this week I hope they will be able to make a decision soon. If we held the photos past year and you need them drop a line, however we will try to return them soon.

A friend of mine who shares office space here has been work on the Mayfair Shopping Center in Milwaukee, Wis. They are at present looking for a Sculptor. Their Architects are Perkins & Will one of the largest in the country. We took the liberty of asking them to see your photos so it might be possible you would receive a letter from them in the near future.

Paul Nevak the friend I mention was their Chief Site Planner for five years although he is now on his own, he felt so enthused over your work, that he felt that your the one they are searching for. So at present we have several things on the fire hoping something might materialize.

It may take some education of the Hospital Board which is our biggest obstacle. They Board is some what conservative, yet they surprise us at times. The Director of the Hospital who was very progressive and was interested in the contemporary building, landscape, and sculptor passed away last month which has slowed the progress along the RIGHT lines.

Hope to have something for you soon. Thanks again,
