Mr. John Rhoden
285 Eighth Avenue
New York, New York

Dear Mr. Rhoden:

Dr. Schneider tells me that you are in New York and that he has written you about the damaged condition in which the "Harlem Globe Trotters" arrived in Pittsburgh.

The top ring (ball) was broken loose from its support. I assume this break can be welded.

If you plan to be in Pittsburgh while in the States you may want to take a look at it.

I have contacted a man at Carnegie Museum who does repairs of this type. While he hasn't examined the sculpture, he feels he can fix it but I will not have anything done to it until I get some word from you.

Yours very truly,

Secretary to Mr. H. J. Heinz II
